

Aqua AI — Consultants App Guide

Version 4.0 · May 2026 · Complete Consultant Manual · Operated by Humara Ltd,
Registered in England and Wales

1. Welcome to Aqua AI Providers

The Aqua AI Providers app is designed for professional service providers on the Aqua AI platform. This guide covers the Consultant role. Consultants manage services, respond to bookings, build their client base, and use AI-powered tools to grow their practice.

Both Breeder and Consultant roles are available within the same app and can be held simultaneously.

2. Permissions

- Location — required for appearing in nearby search results
- Camera — used for uploading images (profile, listings)
- Photo Library / Gallery — to select images from device storage

- Notifications — for booking requests, messages, enquiries, and system alerts

3. Sign Up and Account Creation

Open the app, tap Sign Up, and you will be taken to the sign-in and registration area. Create your account by entering your name, email address, and password. Password reset works through the same domain flow as the standard user app.

4. Booking Notification

Email

When a user makes a booking request, you receive both an in-app notification and an email. The email contains the booking details, the user's name, the service requested, the proposed date and time, and a link to view and respond to the booking.

Booking notification email — booking request details

5. Apply as a Consultant

After creating your account, you are presented with a choice of provider role. Select Consultancy and complete the application.

5.1. Consultant Application

Application details include: personal and business details, company information, services offered (selected from predefined categories), and social media links. Once complete, tap Apply.

5.2. After Applying

You will receive an email confirming your application has been submitted. Provider approval is handled by head office and usually takes 24 to 48 hours. Once approved, log back in and access your consultant area.

6. Consultant Subscription and Pricing

£50 per month plus 10% platform commission on all bookings. Commission is deducted at the point of payment processing. There are no separate promotional pricing tiers for consultants at this time.

7. Consultant Dashboard

The Consultant Dashboard displays: booking count, pending requests, and monthly earnings. Quick access to Services, Calendar, Bookings, Profile, and Analytics.

Consultant Dashboard — overview

8. Services

8.1. Manage Services

Edit price, unit (hour/visit/job), and duration for existing services.

8.2. Add Services

Tap Add Service. Select from the predefined service list. Set price, unit, and duration in minutes. Tap Add Service to confirm.

9. Calendar

View bookings in calendar format. Filter by: All, Next 7 Days, Today, or With Bookings Only.

9.1. Booking Actions

Reschedule (requires 48-hour notice for no penalty) or cancel. The cancel button redirects to the reschedule option first.

9.2. Set Weekly Availability

Tap Set Availability, select your working days, and save. Default is closed on weekends.

9.3. Block Time

Tap Block Time, select start and end time, add an optional reason, and save.

10. Bookings

Bookings are organised into three tabs: Pending, Active, and Completed.

10.1. Booking Flow

New request arrives in Pending. You approve or reject. If approved, the user completes payment. The booking moves to Active. On or after the booking date, you mark it as Completed. View full booking details and start real-time chat from any active booking.

10.2. Cancellation and Rescheduling

Over 48 hours' notice: No trust score penalty. No financial impact. Booking time updated. Both parties notified via email and push notification.

Under 48 hours' notice: Incident recorded against the cancelling party. No financial impact for rescheduling. Contributes to progressive accountability.

Consultant cancellation: Full refund to the user's original payment method. Aqua AI absorbs the Stripe processing fee as a platform integrity cost.

11. Consultant Analytics

Read-only analytics dashboard showing: booking volume and trends, completion rate, earnings summary, rating and review trends, and trust score progression.

12. Trust Intelligence

The Trust Intelligence tab is an AI-powered performance review area. It shows: scores, trajectory, marketing benchmark, performance, rank compared to other consultants, weekly digest, risk breakdown, target rate, and retention scores.

12.1. Predictive Insights

Performance forecasting, demand trends, and badge-related progress. This helps you understand where you stand and what actions may help improve performance.

13. Profile and Business Profile

View your account tier. Edit personal and business information (except email). Manage consultant profile details. View badges and achievements. A strong consultant profile should include: clear name and business name, good bio, accurate contact details, updated social links, profile image, correct area, and current services and availability.

13.1. Add Service from Profile

Services can also be added directly from the profile area. Tap the add service option and complete the service form.

Add service from profile

14. Provider AI Business Assistant

A floating AI assistant accessible from the bottom-right corner of the app. Interact by typing a question or speaking using voice input.

14.1. What It Does

Provides prompts, reports, chat replies, business guidance, profile improvement suggestions, growth and competitiveness support, and booking and service thinking.

14.2. Profile-Linked Intelligence

The assistant links directly into your provider profile. Responses are based on your activity, services, business performance, and current position on the platform.

Provider AI Business Assistant

15. Trust Score and Badges

Your Trust Score is visible in the Badges tab. Badges are earned through platform activity: booking completions, response time, general engagement, and reliability. Trust tiers: Bronze (0–39), Silver (40–79), Gold (80–119), Platinum (120+). Scores recompute nightly.

Provider-specific badges include: Verified Consultant, Specialist, Fast Responder, and others earned through consistent platform activity. Badges are awarded for specific milestones and contribute to your overall tier standing.

Trust Score and Badges overview

16. Marketplace

Providers have access to the same marketplace as users. Browse listings, purchase stock or products, interact with sellers, and use the same buying flow.

Marketplace — browse and purchase

17. Research Tool

The rocket icon on the dashboard opens the Research tool. This helps consultants explore insights and recommendations.

17.1. What You Can Do

Research the market, review competitors, explore service opportunities, and find suggestions to attract more clients.

17.2. Intelligence Report

Key findings based on your current profile, what competitors may be doing better, services in demand, and opportunities to improve competitiveness.

18. Messaging

All messaging is scoped to active interactions. Consultant messaging is available within active bookings only — the thread opens on booking confirmation and closes on completion or cancellation. This is by design to ensure all communication is contextual and auditable.

19. Switching Roles

If you are registered as both a Consultant and a Breeder, switch between dashboards using the role toggle in the top navigation. Both roles share the same account and trust score.

20. Data and Privacy

Your data is protected under the UK GDPR. Client data accessed through bookings is scoped to that booking and must not be used for purposes other than service delivery. Full details are in our Privacy Policy and Provider Policy.

21. Support
